MARKET STUDY: TOWN OF CORTLANDT

Evergreen Manor AL pad (Medical Oriented District) · Westchester County, NY · 110 units (80 AL · 30 MC) · 6 acres

Finding: Marginal; partner role only. Northern Westchester has a solid, mid-income 75+ base, but state data show its licensed AL beds are not full. Across the eight private-pay residences in the market, the DOH-reported census is about 72% of certified beds. The base case needs about 31% of unmet demand (18% at 12% need); the conservative case shows none. The newest buildings lease well (Artis Briarcliff 98%, Artis Somers 92%, The Club at Briarcliff 81%), so the opportunity is product replacement, not unmet need.

1 · PRIMARY MARKET AREA

About 8 miles east of the Hudson (15-20 minutes): Cortlandt, Peekskill, Yorktown, Putnam Valley, Ossining and Briarcliff, Somers and New Castle. The Hudson is a hard edge: Rockland across the Bear Mountain Bridge is excluded. The site sits on Route 202/35 across from NYP Hudson Valley Hospital, the medical anchor for northern Westchester, and the Taconic and Route 9 pull in Ossining, Briarcliff and New Castle. A strict 7-mile ring would be about 120,000 people and too thin to judge.

TOWN	POPULATION COUNTED	75+ (EST.)	65+ HOUSEHOLD MEDIAN INCOME
Cortlandt (incl. Croton-on-Hudson, Buchanan)	43,470	3,387	$88,260 10567, 10520
Peekskill	25,431	1,981	$64,015 10566
Yorktown (incl. Mohegan Lake)	36,569	2,849	$112,842 10598, 10547
Putnam Valley	11,617	873	$81,630 10579
Ossining (town)	40,061	3,121	$84,030 10562
Briarcliff Manor / Mount Pleasant (north)	7,569	590	$126,103 10510
Somers	21,939	1,709	$101,029 10589
New Castle (Chappaqua)	18,180	1,416	$156,852 10514
Philipstown (Cold Spring, Garrison) (50%)	4,990	375	—
PMA, town method	**209,826**	**16,301**	**$97,321**

Population: 2020 Census, rounded. 75+ by town is the county's 75+ share applied to town population, which understates affluent suburbs. 65+ medians: ACS 2024 5-year by ZIP, weighted by estimated 75+ population.

2 · AGE 75+ DEMOGRAPHICS AND INCOME QUALIFICATION

Age 75+ in the PMA (town method × 1.49 calibration)	**24,332**
Conservative case: town method, uncalibrated	16,301
75+ households (0.67 per person)	16,303
Share of 65+ households with income ≥ $75,000 (≥ $100,000 · ≥ $150,000)	59% (49% · 35%)

Income-qualified 75+ households (≥ $75,000, before home equity)	**9,677**

Census tract tables could not be pulled for this study, so 75+ counts are scaled from the town method by the ratio observed at Florham Park (1.49x), where both are available. Income shares come from ZIP-level 65+ medians, converted with an income spread calibrated to Florham Park's tract data (it reproduces 61.9% at $75,000 within half a point). A $75,000 floor with home equity supports roughly $9,000–10,000 a month of AL for 4–5 years in markets with $550,000+ home values.

Source: NYS DOH Adult Care Facility quarterly statistical report, 2026 Q2 (certified beds and resident census), health.data.ny.gov h5s5-hcxg; facility file vn5v-hh5r. "est." marks ATCO estimates where capacity is not published. Excluded: The Sentinel of Mohegan Lake (188 ALP (Medicaid) beds, 180 residents: a Medicaid product, not competitive with private pay); Yorktown ALR, ALP beds (45 Medicaid ALP beds of its 85). Census is residents reported to DOH against certified beds; certified beds exceed operating units, so this understates unit occupancy.

4 · PIPELINE

PROJECT	PROGRAM	UNITS	MILES	STATUS	TREATMENT

5 · DEMAND, PENETRATION AND CAPTURE

	BASE	CONSERVATIVE
AL/MC demand at a 10% need rate ÷ 75% PMA share	1,290	864
Less existing and counted pipeline	−931	−931
Unmet AL/MC demand	**359**	**-67**
Capture needed for 110 AL/MC units, 10% need	**31%**	no unmet demand
Capture at a 12% need rate	18%	> 100%
Penetration today (existing + pipeline ÷ qualified households)	9.6%	
Penetration with this project	10.8%	

Benchmarks: lenders want project capture under 10–15% for AL/MC and treat over 25% as a red flag; AL penetration of 6–10% of qualified households is typical of mature markets. The conservative case uses the uncalibrated town method.

NEED RATE (SHARE OF QUALIFIED 75+ HOUSEHOLDS NEEDING AL/MC)	8%	10%	12%	14%
Capture, base supply	> 100%	31%	18%	13%

7 · ABSORPTION

The model's 29 months (about 3.5 a month) is at the norm. Benchmark Mount Pleasant's first seven months (about 6.5 a month gross) show a new Class A building can lease faster than older stock, but its absorption comes partly from this market. Implied pace for the AL/MC wing: about 3.5 net move-ins a month to 91% occupancy in 29 months.

8 · FINDINGS AND NEXT STEPS

- Cortlandt itself has no Class A AL. The model's $9,680 equals the Class A median, which comes from Briarcliff and Thornwood, 10–13 miles south.
- Weighted 65+ household income is about $97,000; Peekskill ($64,000) and Croton ($74,000) pull it down, Yorktown, Briarcliff and Chappaqua lift it.
- Benchmark at Mount Pleasant (114 units, opened November 2025) is the live comp: 46 residents seven months in. Benchmark is also the operator VS Construction has named for this site.
- Certified beds overstate operating units (semi-private rooms, wings held offline), so true unit occupancy is higher than 72%. A NIC MAP pull would settle it; NIC MAP is not available to ATCO today.

1. Stay in the partner or fee role (capital or GC to VS Construction and Benchmark) rather than sponsor.
2. Ask Benchmark for Mount Pleasant's lease-up curve and rate card.
3. Track the Planning Board hearing on the MOD site plan.

METHOD, SOURCES AND LIMITS

Demand follows the standard AL/MC method: income-qualified 75+ households × share needing help with daily living ÷ share of move-ins from the PMA, less existing and pipeline competitive units (see /method). National context: NIC MAP reports senior housing occupancy above 90% in 3Q26 and the fewest units under construction since 2012; CBRE's H1 2026 survey puts Class A AL cap rates at 6.5% and says new development needs rents 15–20% above market. **NIC MAP PMA data (property-level occupancy, rents and pipeline) is not available to ATCO**; occupancy above comes from New York State DOH filings where they exist. CoStar was not used. Census API access was not available, so 75+ counts outside Florham Park are estimates calibrated to Florham Park's tract data. Every [est.] figure should be replaced by a NIC MAP pull or a third-party study before LOI.
